## SKILLS

HTML, CSS, GitHub, VS Code, C++, React, Node.js, MongoDB, Express.js, Axios

## EDUCATION

COMPUTER SCIENCE & LINGUISTICS B.A.

University of California, Los Angeles (UCLA)

## ABOUT

I'm a Computer Science student at UCLA with a strong passion for software development and intelligent systems. My academic and personal projects reflect a commitment to building efficient, user-focused applications that solve real-world problems. I aspire to pursue a career as a software engineer, with long-term goals of earning a master's degree in Artificial Intelligence and Machine Learning. I'm especially excited by the potential of AI to improve lives and transform industries through innovation, automation, and data-driven decision making.

## PROJECTS

### WELLNEST WEB APPLICATION

*React.js, Node.js, Express.js, MongoDB*

- Collaborated with a team of three to develop a full-stack sleep and dream tracker web app for college students.
- Implemented user authentication, dream logging, profile customization, and interactive leaderboards.
- Built RESTful APIs using Express.js and MongoDB; created responsive frontend components with React.js, CSS, and Chart.js.

### RELATIONSHIP WEB MOBILE

*React.js, Vite, Tailwind CSS*

- Customized a mobile-first React web application to support interactive relationship recaps, including personal image galleries, messages, and music features.
- Implemented Spotify embedding, allowing users to preview songs via clickable album art.
- Modified configuration and styling for user-driven content and responsive design.
